

Change to disc diameter. Brake disc part number 54211

Due to diameter modifications of the car manufacturer (Volkswagen-Group), the diameter of our brake disc 54211 will be reduced from 260 mm to 256 mm.

Although the original spare part has got a new part number, we will introduce this new design as a running change into the market by keeping the existing reference number.

This change of the dimension avoids corrosion at the outer radius, which in the past frequently caused noises, and led to claims in technical inspections.
