

T1575 / T1542

Pagid is harmonising the two references T1575 and T1542. T1542 will cover applications of both part numbers in the future. Therefore T1575 will be phased out.

As you can see in the picture below the parts differ in the shape of the friction material and the plate at the top edge of the pad. T1542 in comparison to T1575 is additionally prepared for wear indicators and fulfills all other criteria of T1575. This makes it the perfect replacement for T1575.

Existing stock of T1542 can be sold without any problems.
