

Difference between pad sets T2444, T2498 and T1376

We would like to inform you about the difference between passenger car pads T2444, T2498 and T1376.

For some models VAG-Group use brake calipers with slightly different abutment widths on the outer side of the brake caliper. This results in backing plates with slightly different widths.

PAGID follows this approach and added corresponding pad sets to range.

Due to this reason backing plates in pad set T2444 and T2498 are all 155,4mm wide whilst on pad set T1376 backing plates are 155,3 resp. 156,5mm wide.

Exact allocation is based on PR-numbers of VAG. You find this information in the service booklet of your vehicle.
