

T1461 / T2145 / T2268

Due to various replacements being made in the OES at Peugeot we will follow the same route and can now harmonize T1461 and T2145 into T2268. Therefore T2268 can be used for all application in the future and is usable retrospectively. Old stock of T1461 and T2145 can be sold out without any problems with the according limitations, which are visible on brakebook.com.
